OLIVERI SUPER BASIN MAKES SINK A PREP AREA FOR BIG JOBS

Corona, Calif. --- The Oliveri double-bowl sink with the Super Basin cuts big jobs down to size. Manufactured in Australia by Tasman Sinkware and now available in North America, this spacious product is one of the largest footprints for a kitchen sink, but still fits in a 39" sink base.

The 10"-deep Super Basin of the model 885U and 886U, with its 12.7 gallon capacity, can handle just about any roasting dish, wok or cookie sheet. Its generous size makes it ideal for larger kitchens.

Accessories included with the sink are a basin protector, basket waste, cutting board and colander, making this unit a self-contained prep area. Adding the optional cantilevered draintray makes it even more versatile for big cleanup jobs. The accessory lip around the sink edge allows Oliveri accessories to be used even when the sink is undermounted.

Tasman Sinkware, the Australian-based manufacturer of Oliveri brand sinks, has produced high-quality stainless steel sinks for both the domestic and export markets for 60 years. Innovators in design and technology, Tasman Sinkware has created a new line of Oliveri sinks for the North American market that complements their extensive European-design product offering.
